HORECA

WELCOMING ATMOSPHERE

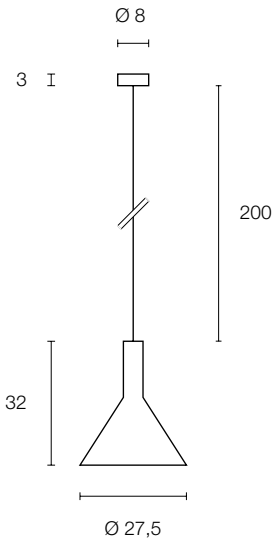

Come in and feel the magic of light that captures you. Guests experience home away from home at the touch of a button. Be it hotel rooms, restaurants or even a fitness area - our high-quality and innovative lighting solutions are designed for your guests that helps create different lighting moods. This gives you exactly the right atmosphere for every room. Intuitive to operate, dynamic, comfortable and energy-saving. Our lighting solutions make the rooms a welcoming favourite place where one can feel good. For your guests. For the operators. For you.

MAKE01

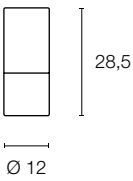

OUTDOOR LIGHT AND SOUND OBJECT

The MAKE01 is an innovative all-in-one loudspeaker, uniquely designed for the first time, which combines joy of music with mood-lighting. A high-quality designer object specially for outdoor use. Be it by the pool, on the terrace or in the lounge, the MAKE 01 transforms every room into a stage for an extra special production – whatever the weather, 365 days a year.

SHOP

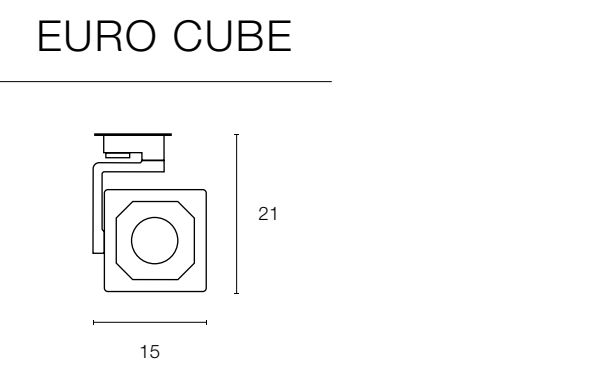

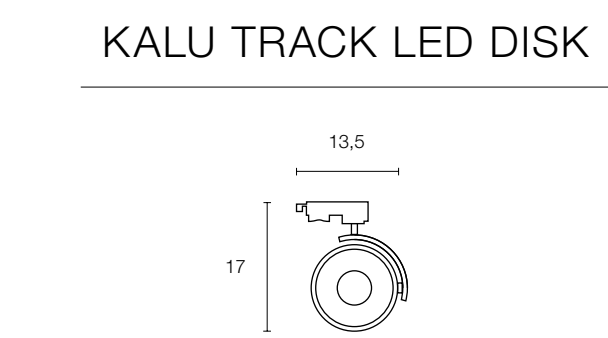

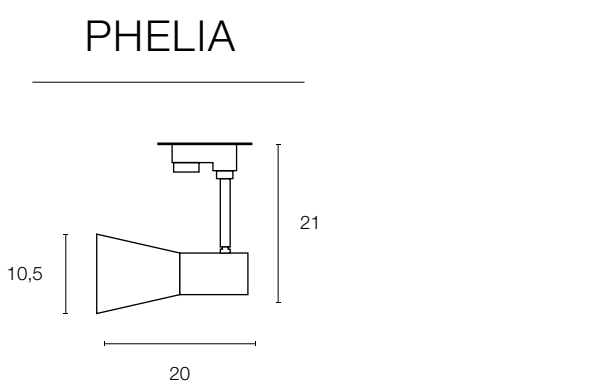

ATTRACTIVE STAGING

To buy, or not to buy? The presentation of the products makes all the difference. The right light plays a decisive role here. It can draw ones attention, highlight details, create moods. Our sophisticated lighting concepts provide a sensual shopping experience. You can skilfully set the scene, by giving products and brands room to work, while you highlight the details. Energy-efficient and sustainable, function-focussed and design-oriented. At the end, this is what makes the difference. For us. For the buyer. For you.

OFFICE

PLEASANT WORKING

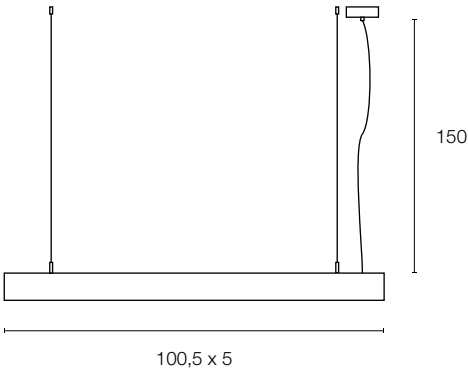

Promote creativity, improve concentration, lower costs, improve the structure of the room: Light provides for the well-being and clear relationships at the workplace. Our lighting concepts can be recommended as they become excellent, multi-tasking additional members of the team. They meet all the requirements of a modern office, remaining pleasantly in the background, but still there, saving costs and being environmental-friendly. They do excellent work, without exception, and at all levels. For the executive floor. For the employees. For you.

PRODUCT CHARACTERISTICS:

Luminaires with built-in LEDs

Dimable with ...

- Phasesfromcutting dimmer
- Phasestocutting dimmer
- 1–10V

Luminaires can be painted over as desired with wall paint,
or even wallpapered after they have been primed.

SPECIFIC DETAILS – RECESSED FITTINGS

8

EEI = (...) (with LED luminaires)

"This luminaire contains built-in LED lamps. The lamps in the luminaire cannot be
replaced." (see EC Regulation 874/2012)

EEI = (...) (with all other luminaires)

"This luminaire is compatible with lamps of energy classes ..."

Luminous flux

The total amount of light generated by a light source is given in Lumen [lm].

Colour rendering index

The colour rendering properties of a light source are described using the Ra Index
(Colour Rendering Index). For light sources used indoors, a CRI of 80 or higher is
prescribed. Light sources for outdoor use must have a CRI of at least 65.

Colour of light

The colour of light produced by a light source is given in Kelvin [K].

Standard SMD LED

SMD stands for Surface Mounted Device. It is a compact LED without wire connec-
tors, rather with direct soldering onto the PCB. SMDs are available in various sizes
and are well suited for illumination purposes.

PowerLED

A PowerLED is a powerful LED with 1W or more power. It places increased demands
on the current stability and therefore has to be used with constant current sources.
If multiple LEDs are connected, they must therefore be connected in series. Con-

necting in parallel is not permitted. In addition, please pay attention to the installa-
tion sequence so that LEDs are not exposed to high currents for short periods of
time as they could be damaged. In general, the following applies: First completely
connect the secondary circuit [LEDs to the driver], then connect the primary circuit
[driver to the power source].

Chip On Board LED [COB LED]; Flat LEDs

This is an LED with an extremely flat shape. The advantage of COB LEDs are that
they have good heat dissipation for technical implementation with cool surfaces,
providing the possibility of high luminous efficiency with long service life.

Please note:

A large proportion of the products presented in this catalogue are protected by
trademarks, registered design, industrial design or patents. Violation of the protec-
tive rights or use of text and layout design without our permission will be prosecut-
ed. All products of our range are subjected to stringent quality assurance measures
and meet all of the generally applicable standards. The illustrations and specifica-
tions contained in this catalogue are for illustration purposes only and are not bind-
ing in terms of colour, shape, design and technical specifications.

All length data are presented in centimetres, unless otherwise indicated.

The presentation of our luminaires with realistic and exemplary application photo-
graphs has been made possible by the friendly cooperation and agreement of the
owner or designer of each property shown in the foreground of the pictures. Once
again, we would like to take this opportunity to thank those who gave their permis-
sion for the photographs to be taken and used in this publication.
